Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Sunday 25 Jul 2021 until 23:59 on Monday 26 Jul 2021

Forecast Issued on Saturday 24 Jul 2021 at 15:36

Confidence: High for predominantly settled conditions to end the weekend and for the change to cooler and much more changeable showery weather from Tuesday onwards. Low for cloud and precipitation details from Tuesday.

Headline for Sunday 25 Jul 2021: Early cloud breaking to give sunny spells and the odd afternoon shower.

Mountain weather hazards on Sunday 25 Jul 2021

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Medium Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** High Likelihood

Forecast for Sunday 25 Jul 2021

Weather: Often cloudy during the early hours with the odd light shower possible and with hill fog shrouding the higher summits. The cloud will break during Sunday morning allowing sunny spells to develop, and there is a small chance of an isolated afternoon shower. The evening will be dry with some late sunshine.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 90% or better by mid-morning.

Visibility: Generally very good with excellent clarity, however becoming rather misty in any showers during the early hours, and beneath areas of low cloud which will cover many slopes above 400-500 metres during the early hours and at first on Sunday morning. This low cloud will steadily lift and break so that my late morning only small amounts of cloud will linger around 800m, occasionally covering the higher summits and obscuring views on the highest routes. Any afternoon showers may briefly obscure views of nearby hills.

Meteorologist's View

There will be strong sunshine at times throughout the day and UV levels will be high or very high, so sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 24 Jul 2021	2.2mm	2.2mm	2.2mm

Forecast for Monday 26 Jul 2021

Weather: Dry with clear periods during the early hours with some short lived fog and patchy low cloud in the valleys around dawn. Dry with sunny spells through the morning, but cloud will build from midday bringing the risk of isolated heavy showers in the middle of the afternoon, with a chance these could turn thundery bringing a risk of hail and lightning. Any showers or thunderstorms should die away by early evening leaving dry if rather cloudy conditions.

Maximum wind: Westerly 15mph.

Chance of cloud free mountain/hill tops above 600m: 60% becoming 90% or better by late morning.

Visibility: Generally very good, however locally poor in any short lived valley fog around dawn when low cloud may cover slopes between 200m and 600m, bringing locally very poor visibilities. Some fair weather cloud will develop in the morning on slopes above 800m, occasionally covering the higher summits and obscuring views on the highest routes, but this cloud should lift clear of the summits in the afternoon. Any afternoon showers or thunderstorms will briefly obscure views of nearby hills.

Temperature: **Valleys:** Plus 11 Celsius becoming Plus 23 Celsius.
At 600m: Plus 16 Celsius.
Freezing level: Well above the summits.
